Ride Performance innovation, accelerated™
Forward thinking. Forward moving.

Where transportation goes for innovation

Tenneco’s focus on comfort, safety, customer satisfaction and innovation goes beyond the main suspension system of a truck or commercial vehicle. It extends to the cabin as well, where Tenneco seat dampers help ensure a smooth, comfortable ride for the driver.

Tenneco offers a full range of seat dampers to appeal to the varying needs of its customers. Tenneco’s standard seat dampers are pre-tuned to a customer defined optimized setting in order to provide maximum comfort for the driver. Manual adjustable dampers, however, allow each individual driver the ability to custom tune their ride by adjusting the damping forces to suit their preferences.

Velocity progressive dampers (VPD) are Tenneco’s automatic adjusting seat dampers. They are tuned to have a more progressive damping characteristic as compared to standard dampers, helping them react quicker and be more responsive to large impact events.
SEAT DAMPERS FEATURES & BENEFITS

Standard
- Provides comfort with pre-set damping levels
- Most economical seat damper

Adjustable
- Allows driver to manually custom tune ride by adjusting a lever

VPD
- Tenneco’s automatic adjusting seat dampers
- Tuned to have more progressive damping characteristic as compared to standard dampers
- React quicker and are more responsive to large impact events
PIONEERS IN RIDE PERFORMANCE

At Tenneco, innovation is a hallmark of everything we do. In our advanced ride performance technologies and solutions. In our unique, total-system integration expertise and approach. In our commitment to partnership and collaboration. We’re always looking beyond the technology horizon to foresee and develop the next-generation ride control solutions that accelerate our customers’ success and keep them moving toward the future.

From development through delivery and beyond – we help our partners drive transportation innovation, full speed ahead.

TENNECO IS EVERYWHERE OUR CUSTOMERS NEED US

Our reach is global, but our focus is local, helping customers in each region adapt our global capabilities and technologies for local applications.

• More than 30,000 employees worldwide
• More than 90 manufacturing facilities
• 15 state-of-the-art research and development centers
• 3 dedicated research and development centers for ride performance engineering

Markets served:
• Commercial vehicle
• Agriculture
• Construction
• Passenger car
• Bus
• Specialty
• Military
