

## C-6010 **CHAMPION INDUSTRIAL SPARK PLUG**

Tenneco is proud to introduce our new Champion® branded M18 J-Gap series with Double Iridium electrodes. The C-6010 is a high performance industrial spark plug developed for usage in natural gas engines in stationary power generation applications where gas conditions are challenging and in gas transmission applications where the customer is looking for extended service life.

These plugs are newly designed to offer superior lifetime and durability in stationary gas- operated industrial engines. Improved ceramic and enhanced electrode design help end-users meet increasing demands placed on gas engines, such as reduced downtime and stricter emissions requirements.

# C-6010

## Electrode Gap, Nom.

0,2mm 0,25mm 0,3mm

## Electrode Resistance

2 kΩ 3 - 12 kΩ 16 kΩ

## Basic Technical Data

Properties	C-6010
Suppressor Resistor	3 - 12 kΩ
Hex	22.2mm / 7/8"
Thread	M18x1.5
Thread length	20.6 mm / 13/16"
Precious metals	Iridium/Iridium
Electrode gap	nom. 0.25
Tightening Torque (Cast iron)	40-50Nm

## Dimensions

## Target Applications

- Stationary Biogas or Natural Gas Engines

## Engines

- Caterpillar, Cummins, Waukesha

## Cross References

- Denso GI3-1 , Denso GI3-5, NGK AS2-25, Bosch 7305
